

Great things MGE can do!

Suggestions from RePower Madison to make our community a national leader.

Propose Progressive Rates to Create Affordable Bills

Increase customer control over bill by reducing electric and natural gas fixed fees to 2014 levels for residential and small business customers in proposal to PSCW for 2017 rates.

- Do not add new demand charges or distributed generation specific charges.
- Improve net metering policies with supportive buyback rates, annual true-up, and by including value of solar.

Reduce Greenhouse Gas Pollution

Reduce emissions of greenhouse gas pollution by 60% by 2030 including electric and natural gas sources with a 2005 baseline and mass-based measurements.

- Reduce Madison's dependency on fossil fuels by divesting from coal and gas plants.

Become a National Leader in Clean Energy

Provide 50% of energy from renewable sources and reduce overall energy use from current levels by 25% (through efficiency) by 2030.

- Cooperate with 3rd party installers and reduce insurance requirements.
- Pursue 5 community solar or renewable energy projects by end of 2017.
- Develop, offer, and promote behavioral efficiency programs.
- Overhaul Green Power Tomorrow program.
- Remove barriers to interconnection.
- Seek new regulatory models.

Reform MGE Corporate Practices and Business Model

Become a Certified B Corp by 2018 and discuss at 2016 Shareholder Meeting.

- Form a Community Partnership with oversight of plan progress and rate proposals.
- Add new members to MGE Board of Directors to reflect community values.
- Increase corporate investment in building a sustainable energy system.
- Be a good corporate citizen. Align lobbying with public statements.
- Base executive compensation on clean energy metrics.

Support Government Clean Energy Initiatives and Goals

Be in full compliance with City and County sustainability goals by 2020 and publicly support the Clean Power Plan.

- Coordinate with local government clean energy efforts.
- Publicly support a higher Renewable Electricity Standard and the Clean Power Plan.
- Publicly support the need to address and reality of human-caused global warming.

*Come to our event to debrief and discuss today's workshop.
7pm on May 4th at Friend's Meeting House 1704 Roberts Court
